

Instructions to get a complete abstract submission

Abstract submission

Abstract last saved 2016-01-13 17:52:55 ✓

* required fields

Title* Testing the Abstract Submission Tool

Abstract* There have been a few occasions were people had difficulties to submit a complete abstract, not many but too many to ignore the problem. This abstract shall be used to demonstrate what is needed to succeed.

Preference* Oral/Poster presentation Poster presentation

Save Abstract

The little red stars mark required fields, i.e., you need a title, an abstract, and to decide a preferred presentation mode. In addition, you need to have at least one author in the list box showing the authors and to identify the presenter in the last box. You do then need to SAVE before the tick mark appears indicating a complete submission.

To define an author, you can fill in the three fields Name, Affiliation, and Country. Alternatively, if the author has a registered profile, you can fill in the email address (used in the profile), press the TAB key and the system will fill in the author's details for you. Whatever route you choose, you then need to click "Add Author" to get your entry into the list box.

Assuming you have more than one author listed successfully, but have not defined who is the presenter, then you need to define one before you will get the tick mark. For that you click the radio button next to the presenter's name in the list box and then click "Presenter" next to the box. You can change this choice and also the sequence of authors as they should appear in the abstract book.
